Welcome!

Civil Air Patrol is pleased to announce new changes to the senior member learning program! In support of the launch of Volunteer University senior members will now see a Level Training tab in the menu. This will take you to a listing of learning modules available for your training level. Some modules are available immediately to start, while others can only be accessed if you are enrolled in an online cohort. Cohort sign ups are available in eServices here.

Important

If you have Level 1 and are looking to complete your Level 2 training it is important for you to select a Path. There are 4 paths available within Level 2 consisting of New Members, Former Cadets, Prior Military, and Professionals. You can select a path within the new Professional Levels tool in eServices here. Once selected your path must be approved at which point you will receive access to the Level 2 online modules.
