

EDUCATION DEGREES:

The Community College of the Air Force (CCAF)

When you join the United States Air Force, you're automatically enrolled in the Community College of the Air Force. It's not only America's largest community college, but it's also the only degree-granting institution in the world dedicated entirely to Air Force personnel. The Community College of the Air Force is also a unique combination of on-duty and voluntary off-duty courses with classes and times that are flexible to meet your needs.

You'll work toward your associate's degree in applied science in one of five career areas — aircraft and missile maintenance, electronics and telecommunications, allied health, logistics and resources or public and support services. You'll be earning college credit just for doing your job while gaining invaluable experience to help your career take off.

The Community College of the Air Force (CCAF) is a worldwide multi-campus community college established to meet the educational needs of Air Force enlisted personnel. CCAF is regionally accredited by the Southern Association of Colleges and Schools/Commission on Colleges (SACSCC) as an occupational educational institution.

The College is operated by and for the benefit of all airmen. (See [Community College of the Air Force](#)) Base Education counselors serve as academic advisors for CCAF students and are the primary means of communication between CCAF and Air Force enlisted personnel. Academic credit for CCAF is earned at technical schools, duty stations, and college campuses throughout the world.

Specific degree programs in each Air Force specialty area are designed to provide students with the theoretical background to perform as technical experts and competent supervisors in their fields. The primary goal of the CCAF is to allow airmen to progress toward and ultimately earn an Associate Degree in their Air Force specialty with minimum disruptions from Permanent Changes of Station (PCS), Temporary Duty (TDY), and shift work.

To learn more, visit the Community College of the [Community College of the Air Force website](#).

At Civil Air Patrol, the volunteer auxiliary of the U.S. Air Force, we're helping develop tomorrow's aerospace workforce.
