

WMIRS 2.0

Multiple Flight Release

Function Description

To increase the efficiency of the flight release process, WMIRS 2.0 supports the ability to release multiple flights at the same time. Once a pilot has completed the ORM process or had the FRO assist in copying an ORM to their sorties (see WMIRS 2.0 - Copy ORM), the FRO can complete a single FRO checklist and then use it to release one or more of the pilot's sorties. This eliminates the requirement for the FRO to provide the same answers to the same questions for each of the sorties. However, using this approach requires the FRO to consider and discuss the appropriate risk and release factors in the context of each of the sorties to be flown. Once multiple flights have been released by the FRO, the duplicated FRO checklists are independent and can be voided or edited individually. In some cases, individual releases may be voided by pilot actions such as editing the ORM or the sortie.

NOTE

Flights operating on an IFR Flight Plan cannot be released more than two hours before takeoff time and any release older than two hours is considered void. As a result, the multiple flight release function should not be used to release multiple IFR sorties.

Initial Conditions

When the FRO goes to release a flight, the eFR Details screen will contain a FRO Checklist section similar to the one shown below. In this case, you can see that each sortie has an ORM score. This may be a result of the pilot's actions or they may have enlisted you to copy the ORM as described in WMIRS 2.0 – Copy ORM. Having confirmed that each flight that is being considered for release has a score, the FRO will select [Click here to complete FRO Checklist](#) and answer the checklist questions.

FRO Checklist

Status: Not Complete
[Click here to complete FRO Checklist.](#)
NOTE: FRO Checklist has to be submitted before the flight can be released.

Flights to Release

Approve	Mission No/Sortie No	Pilot	Crew	Tail No	Aircraft Type	Sortie Type	Departure	Landing	Depart / Landing	Flight Plan	ORM Score		
<input type="checkbox"/>	18-A-3440 / AD180	Curell, Kenneth E (418328)		N821CP	C182	ORIDE	06/28/2018 17:00	06/28/2018 18:00	MGM / MGM	NONE	4 (Low)	Update CRM	View High or Extreme CRM Items
<input type="checkbox"/>	18-A-3440 / AD181	Curell, Kenneth E (418328)		N821CP	C182	ORIDE	06/28/2018 18:30	06/28/2018 19:30	MGM / MGM	NONE	4 (Low)	Update CRM	View High or Extreme CRM Items
<input type="checkbox"/>	18-A-3440 / AD182	Curell, Kenneth E (418328)		N821CP	C182	ORIDE	06/28/2018 20:00	06/28/2018 21:00	MGM / MGM	NONE	4 (Low)	Update CRM	View High or Extreme CRM Items

Once the FRO Checklist has been completed, status will change to **Complete**. At this point, the FRO can individually select the sorties that they are willing to release. Once the selections are complete, the FRO completes the checkboxes at the bottom of the eFR Details page; enters their CAPID and PIN, then selects Approve or Disapprove as shown on the following page.

Multiple Release Results

In the example shown below, the FRO decided to release all three sorties. The sortie numbers are returned in the confirmation screen. At the bottom of the screen there is a button that will permit the FRO to cancel the release if it was made in error. This button will only cancel the release of the base sortie – the one circled in red below. The release for each of the other sorties would have to be cancelled by going to the Air Sortie List, selecting Release, and cancelling the release for each one at a time.

Home > Mission Info > Operations > Air Sortie List > Air Sortie > eFlight Release Details

Sorties A0180, A0181, A0182 Released

Mission Number: 15-A-3440 Sortie Number: **A0180**
