

CIVIL AIR PATROL

Aerospace Education

The Air Force Association presents

ACE

a K-6 STEM program

The **Aerospace Connections in Education (ACE) Program** is a free, hands-on, fun and engaging Aerospace/STEM Education program for educator members of the Civil Air Patrol who teach in Grades K-6.

Aerospace

Studying air and space can inspire students to learn more about science and technology. It's never too early to encourage an interest in STEM topics. Planes, rockets, spacecraft and more launch young students into STEM adventures. Aerospace as a learning incentive works.

Connections

The ACE Program connects all subjects to aerospace. Students will see how they can learn math, science, reading and social studies using Aerospace Education. Program lessons also include character and physical education lessons.

in Education

You will receive over 20 grade-specific lesson plans and a class set of educational materials. Teach the lessons in any order and use as many as you like. "ACE" means the best of the best. **Make all your students ACE Students today!**

Join today

1. First, join as an **Aerospace Education Member (AEM)** if you have not done so. Go to capmembers.com/joinaem.
2. If you already are an AEM and have your CAP ID, log onto capnhq.gov.
3. Go to Aerospace Education > Ace Registration.
4. Complete the three tabs in ACE Online Registration.
5. Click "Submit," and you are DONE.
